DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-32 drawn to a semiconductor device, classified in class 257, subclass 190.

II.A Claims 33-37 drawn to a method of making a semiconductor device, classified in class 438, subclass 46.

II.B Claims 38 drawn to a method of making a semiconductor device, classified in class 438, subclass 478.

The inventions of Group I and Group II.B are distinct, each from the other because of the following reasons: Inventions II.B and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP ' 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as forming the semiconductor structure of Group I without involving the step of forming a silicon germanium layer on a gallium nitride layer as recited in Group II.B.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the

Art Unit: 2811

search required for Group I is not required for Group II.B, and separated examination would be required, restriction for examination purposes as indicated is proper.

In addition, Claims 1, 29 and/or 30 in Group I and claim 33 in Group II.A link inventions of I and II.A. The restriction requirement between the linked inventions (Group I and Group II.A) is subject to the nonallowance of the linking claim(s), claims 1, 29, 30 and 33. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Applicant is advised that the response to this requirement, to be complete, **must include an election of the invention to be examined between Group I and Group II** (note: Group II includes subgroups II.A and II.B) even though the requirement may be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2811

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
